

Prevention of Collision at Sea – Dead Right? Just Plain Dumb!

■ by VINCENT T. PICA, II

Division Captain, Division 18 (ISR) - United States Coast Guard Auxiliary

When I was putting together the quick-and-dirty on several rules at once (see *SSP*, "Rules, Rules, Rules," 1/09/08), I thought about including Rule 17: Action By Stand-On Vessel since it seems, on first blush, to lend itself to a short "here it is and here is what it means." Rule 17 is the simple reciprocal of Rule 16, which was described in the 1/09/08 column. But Rule 17 has some subtle nuances that, in failing to understand them, may in fact lead to more collisions at sea than people recognize...Call it what you will—but getting into a collision at sea because you thought you had the "right of way" is just plain dumb, bad seamanship and potentially fatal.

What Does Rule 17 Say?

Rule 17-a-i states: Where one of two vessels is to keep out of the way, the other shall keep her course and speed.

OK, that is easy enough. What's the big deal? 17-a-ii states: the latter (the stand-on vessel) may, however, take action to avoid collision by her maneuver alone, as soon as it becomes apparent that the vessel required to keep out of the way is not taking appropriate action in compliance with these Rules.

Right. If the other guy isn't doing what he is supposed to do, I can do it for him. Still got it...

17-b states: When, from any cause, the vessel required to keep her course and speed finds herself so close that collision cannot be avoided by the action of the give-way vessel alone, she shall take such action as will best aid to avoid collision.

Huh? How is 17-b different from 17-a-ii? A key difference—17-a-ii says the stand-on vessel *MAY* take action—17-b says the stand-on vessel *SHALL* (which means *MUST* in COLREG-speak) take action. The burden to avoid collision is now shared. Remember, in front of an admiralty or maritime board, 100 percent blame is apportioned and it is never 100-0. You can't claim that you were forced into a collision because of 17-b...17-d, by the way, affirmatively says that no matter what the stand-on vessel does, the give-way vessel is not relieved of her duty to act. And if there is a 17-d, there must be a 17-c...

17-c states: A power-driven vessel which takes action in a crossing situation in accordance with the subparagraph 17-a-ii of this Rule to avoid collision with another power-driven vessel shall, if the circumstances of the case admit, not alter course to port for a vessel on her own port side.

If she won't give way to the vessel on her starboard side, i.e., the offending vessel is on your port side, turn to starboard and run alongside her (resist the urge to mount a boarding party!). But don't forget the aspect of "suction" that we wrote about on 9/19/07 (*SSP*, "Break All the Rules") which spoke about the collision between *HMS Hawke*, a British man o' war, and the *RMS Olympic*. Like the *Hawke*, you might get sucked into the very vessel that was the proximate cause of the collision at sea. It is reprinted here for your reading convenience and in

the interest of your ever-expanding seamanship knowledge. From "Break All the Rules":

"...there is a famous naval collision that speaks directly to this circumstance. It happened on September 20, 1911 and it involved the 882-foot ocean liner *RMS Olympic* and the 360-foot British man-o'-war *HMS Hawke* near the Isle of Wight.

Hawke saw *Olympic* on her port side but not reacting to signals and whistles so *Hawke* put the helm over hard to starboard to attempt to run parallel. Within seconds, the suction effect of the far larger *RMS Olympic* pulled the *HMS Hawke* into her. An official Board of Inquiry eventually found largely against *Olympic* but White Star, the owner of the *RMS Olympic*, countered that *Hawke* was at fault as the over-taking vessel and steered directly into her. After many scientific experiments using the technology of the day, *Hawke* withstood the challenge based on the suction effect of the *RMS Olympic*. The captain of the *RMS Olympic* said that, "In all my 31 years as a White Star captain, I have never heard of such a theory as suction."

The captain's name was Edward J. Smith. His next commission was a ship even grander than the *Olympic*. It was *RMS Titanic*."

BTW, if you are interested in being part of USCG Forces, email me at USCGAUX2008@aol.com or go direct to MaryJo Cruickshank, who is in charge of new members matters, at FSO-PS@emcg.us and we will help you "get in this thing..."

WE NEED YOU!

Join Our Great Team!

Why Would You Want To Join Our Service?

- Provide an important and valuable service to your community
- Receive free training including CPR/First Aid, EMT Basic
- Advanced Life Support and Paramedic Training
- Belong to a group of special individuals dedicated to saving lives
- Form new friendships
- Improve your self confidence and your ability to work under pressure

We Have Different Types of Memberships
In Our Organization To Meet Your Needs

Mastic Ambulance Company

HERE TO SERVICE YOUR COMMUNITY

Call: (631) 281-4357

P.O. Box 5 • Mastic, NY 11950

No experience is required to join. Applicants do not have to live in Mastic in order to join.
